

Coding Using Scratch - Make a Game Lessons – Grade 4

1) Create four arrow blocks to move character one.

One up arrow block, one down arrow block, one right arrow block, and one left arrow block.

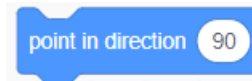

Change the block by clicking the arrow beside the word space.

Add all of the motion blocks as shown.

The point in direction block has been purposefully left blank in the sample below.

Set the point in direction block to match the direction of the arrow key.

2) Open link. Add character. Resize character to 25.

<https://scratch.mit.edu/projects/635273438>

Add same code blocks as used in lesson 1.

Complete maze using the arrow keys.
