

Grade 5 - Scratch Geometry – Intro Lesson

In this lesson you will use the basic Motion blocks, Pen blocks, and some Control blocks to create a square. This will require you to draw upon your math and geometry skills. Go to the Extensions and click to add the Pen blocks menu.

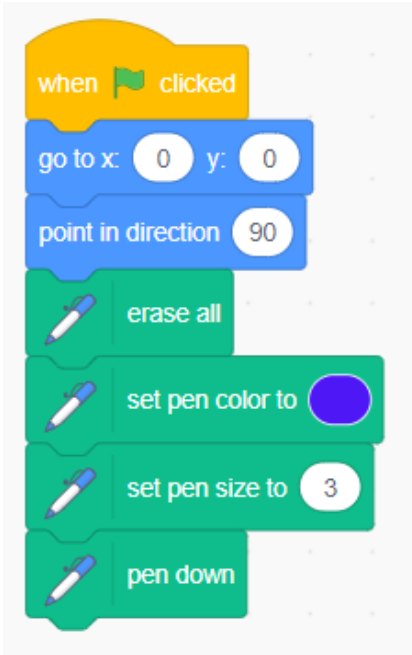

Resize your sprite to about the size of a nickel.
Click the Events blocks menu. Add Event when green flag clicked.

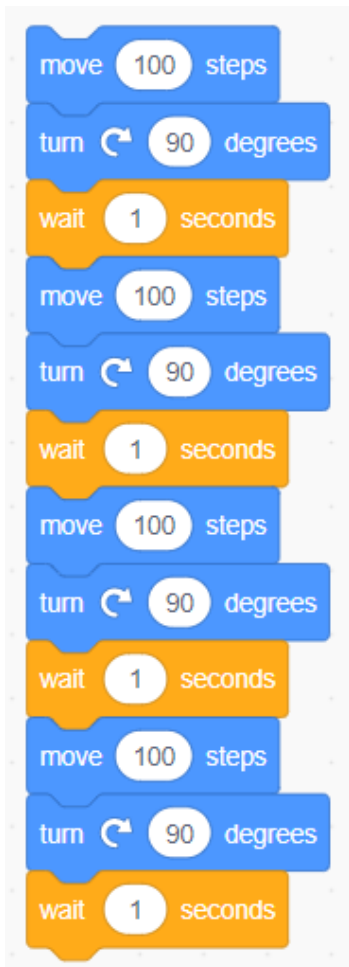

Add the following start up blocks.

[Start up blocks get the program ready so that the action blocks can do what they need to do.]

[Not change pen size. Use set pen size.]

Add the following move, turn, and wait blocks to the blocks above to create a square.

When ready click the green flag above the stage.
